AI in everyday challenges

Objective

is to apply LLMs in an everyday challenge faced by the students. This helps to improve critical thinking, problem solving and creativity of students. At the same time, they learn how to apply AI in a real-world situation**.**

GROUP 1 - The Forgetful Student 🎒

University students often rush between lectures, labs, and activities. They sometimes forget important things such as ID cards, chargers, USB drives, books, water bottles, or assignment materials. Design a product that helps students remember and manage the things they need throughout the day.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 2 - The Distracted Student 🎧

Students want to study, but notifications, social media, conversations, noise, and other distractions make it difficult to stay focused. Many students start studying with good intentions but lose concentration after a short time. Design a product that helps students create and maintain a better study focus.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 3 - The Food Waster 🍱

Students often buy more food than they can eat, forget food they have stored, or throw away leftovers because they don't know what to do with them. At the same time, other students may be

looking for affordable food. Design a product or service that can help reduce unnecessary food waste.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 4 - The Dehydrated Student 💧

Students can spend several hours attending lectures, working in labs, or studying without realizing that they have barely had any water. They may remember to drink only when they become thirsty. Design a product that encourages students to maintain better drinking habit throughout the day.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 5 - The Busy Student ⏰

University students need to balance lectures, assignments, group projects, studying, extracurricular activities, personal time, and deadlines. With so many things happening at once, important tasks can easily be forgotten or left until the last minute. Design a product that helps students organize and manage their time more effectively.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 6 - The Plastic Problem ♻️

Students regularly use disposable cups, bottles, food containers, shopping bags, and other single-use plastic items. Although many students want to be more environmentally friendly,

convenience often wins. Designing a product that makes reducing plastic waste easier and more attractive for students.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 7 - The Overloaded Student 🎒

A typical university day may require a laptop, charger, phone, books, notebooks, stationery, water bottle, headphones, ID card, and many other items. Carrying everything can become uncomfortable and inconvenient. Design a product that helps students carry, organize, or reduce the number of things they need to take with them.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

GROUP 8 - The Budget-Challenged Student 💰

Students have many small expenses every day food, transportation, subscriptions, coffee, shopping, printing, and social activities. Small purchases can quickly add up, making it difficult to understand where their money is going. Design a product that helps students understand, control, and manage their spending.

Your challenge: Use an LLM as your product-development partner. Create an innovative product that addresses the situation above. You must develop a product concept, name, key features, target user, visual prototype/mock-up

Final Presentation

- 2–3 minutes per group
- Briefly explain the problem, product, development process, and how LLMs were used.
